

Cylinder Straps

Designed with:
3M™ Novec™ 1230
Fire Protection Fluid

ST 10100, ST 10200, ST 10600, ST 10900

The mounting brackets are used to securely attach the cylinder to a wall or a unistrut frame channel.

The straps are manufactured of stainless steel band formed to the radii of the cylinders with flanges for bolting to continuous slot framing channel 1100 H unistrut.

The channel is to be provided by installer. The cylinder bracket must be secured to a surface such that the bracket will withstand a load up to 5 times the cylinder weight.

Part No.	Quantity Required	Cylinder Size (lbs)	Cylinder O.D. (in)	Width (in)	Listings/Approvals	
					360 PSI/25 Bar	500 PSI/34.5 Bar
